Thursday, 14.02.2019

Wednesday, 13.02.2019

09:30	Welcome, introduction and hand-outs	Huang Shen Weber
09:45	Lecture and demonstration: Systematic approach to equipment and instruments	Weber Hosemann Kühnel
10:30	Lecture and demonstration: CT-Analysis with navigation system	Shen
11:15	Master dissection and hands-on dissection*: Nasal endoscopy, endoscopic septoplasty, handling of the middle turbinate (concha bullosa)	Hosemann
12:00	Lunch	
13:00	Lecture, master dissection and hands-on dissection*: Uncinectomy / infundibulotomy, maxillary sinus ostium, middle meatal antrostomy type 1-3	Weber
14:30	Coffee break	
15:00	Lecture, master dissection and hands-on dissection*: Anterior ethmoidectomy, dissection of the retrobullar and suprabullar recess, dissection of the frontal recess, frontal sinus drainage type I, IIa	Hosemann
17:30	End of day 1	

* One whole specimen is available for two participants (one side at disposal for each participant). Dissection is done on a rotating basis.

08:30	Lecture, master dissection and hands-on dissection*: Posterior ethmoidectomy, spheno-ethmoidal recess, sphenoid ostium, transnasal / transethmoidal / transethmoidal-transnasal sphenoidotomy	Hosemann
10:30	Coffee break	
11:00	Lecture, master dissection and hands-on dissection*: Dissection of vessels: sphenopalatine artery, anterior / middle / posterior ethmoidal artery	Shen
13:00	Lunch	
14:00	Lecture, master dissection and hands-on dissection*: Management of complications : orbital decompression (endonasal decompression, lateral canthotomy and inferior cantholysis), duraplasty	Kühnel
15:30	Lecture, master dissection and hands-on dissection*: Turbinoplasty of the inferior turbinate and posterior translacrimal approach to maxillary sinus	Weber
16:30	Final test and Evaluation of FESS Course Coffee break	Hosemann Kühnel Shen Weber
17:00	Closing ceremony and certificates	Hosemann Kühnel Shen Weber

* One whole specimen is available for two participants (one side at disposal for each participant). Dissection is done on a rotating basis.

Special highlights of our Hands-on FESS Course are:

- Structured anatomic preparation, each step referring to clearly defined anatomical landmarks, after concise lectures and master dissection.
- Training places for dissection are very well-equipped with HD-videoendoscopy, a large variety of microsurgical instruments, shaver and navigation.
- Intensive supervision with at least one experienced supervisor for two dissection places.
- Specific adjunctive course material like access to essential videoclips of all important surgical steps as well as accompanying hand-outs are inclusive.

Each complete, nature-identical anatomical specimen is subjected to preparation by two participants.
