OBJECTIVES

At the end of this course each student should be able to:

- Safely introduce and pick up a 3/8ths curved needle in an appropriate position to make a bite through tissue.
- Handle the needle to quickly adjust to desired angles
- Pass a needle and suture through tissues at suitable depth, angle, and distance for interrupted and continuous suturing
- Tie a safe laparoscopic Surgeon's knot
- Create a laparoscopic tumbled square knot
- Demonstrate continuous suturing, maintaining tension and completing the suture line safely.
- Be able to apply the techniques to various clinical situations, such as bariatric surgery, hepatopancreasbiliary surgery, or colorectal surgery
- Gain experience in live animal general laparoscopic procedures

EDUCATIONAL METHODS

- Interactive theoretical and video sessions between faculty and course participants
- Live and pre-recorded operative demonstrations
